

Practical guides to help disabled patients to access GP online services

Aimed at supporting people with sight loss, hearing loss, autism or learning disabilities, a series of new guides have been developed to help patients use GP services online such as book appointments, repeat their prescriptions and view medical records.

Bespoke guides have also been published to help people access online services, such as how to sign up to online services, how to keep accounts secure and how to request access for a carer.

These guides can be found via the following link:
